DETAILED ACTION

1. It is noted that the response submitted April 29, 2005 refers to two serial numbers 10/727,403 and 10/037,343 and uses the title to 10/037,343. However, it is readily apparent that the response of April 29, 2005 belongs in application number 10/727,403.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8, 12, 13, and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsutsui et al. (US Patent Number 4,768,705).

Tsutsui et al. disclose a motorized ceramic mixing valve cartridge and a controller that controls the motor in response to the sensed temperature in comparison to a user-inputted temperature.

4. Claims 1, 4, 5, 8, 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. (US Patent Number 4,953,236).

Lee et al. disclose a motorized mixing valve cartridge and a controller that controls the DC motor in response to the sensed temperature in comparison to a user-inputted temperature.

5. Claims 1, 4, 5, 8, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pillola et al. (US Patent Number 5,755,262).

Pillola et al. disclose a motorized mixing valve cartridge and a controller that controls the motor in response to the IR proximity sensor.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsutsui et al. or Lee et al., or Pillola et al. in view of Kosarzecki (US Patent Number 4,078,574).

None of the base references discloses multiple orifices to accommodate different sized cartridges with a plug able to close unused orifices. Kosarzecki et al. disclose using multiple orifices to accommodate different sized cartridges with a plug able to close unused orifices in a similar valve system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the multiple orifices with the valve system of any of the three base references in order to encourage interchangeability and reduce costs as taught by Kosarzecki et al.

Response to Arguments

8. Applicant's arguments with respect to the original claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
